Digital File Requirements for Printed Shades

Resolution:

Minimum of 100 dpi for images at 100% size graphic is printed on shade

File types accepted:

EPS, TIFF, JPEG, PDF, PSD

How to set up file:

Artwork should be set up to measure size without bleed. For example - if a shade is measured to 24 in. (width) x 36 in. (height) the artwork should be set up to 24x36. If floating artwork in the shade (ie. logo) then you can simply provide the art to us and give the size you want the art in the shade.

Colors:

If you need to get a close match to a specific color you will need to provide either a printed reference (send by mail to us) or provide a Pantone color no. We can work to color match for vector files (ie. Adobe Illustrator). Not all file types and or artwork can we isolate and color match to.

Sending Files:

Artwork can be sent via www.yousendit.com or on a CD/DVD by mail. If sending through website, make sure and .zip the file first.

Fonts:

IMPORTANT - If supplying artwork, convert all fonts to outlines or paths. Font problems are the most common problem with files received.
